

TORCHES

Nos. 2 and 3

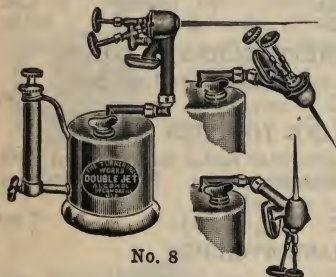

No. 4

No. 100

PHOENIX PUMPLESS GASOLINE TORCHES

The Phoenix Torches are made and operated entirely without a pump of any kind, thus eliminating one of the greatest objections and annoyances connected with gasoline torches. These torches are seamless and without a soldered or brazed joint of any kind. They have no loose parts to get out of order; no washers or gaskets to be renewed.

No. 8

No. 2 is a handy size torch, and for efficiency on light or heavy work can always be depended upon. Will burn $1\frac{1}{4}$ hours and gives 2500 degrees of heat.

Trade No.	Mfrs. No.	Cap. Pints	SIZE, INCHES Height	Width	WEIGHT, POUNDS Net	Ship.	Price Each
148530	2	$\frac{3}{4}$	6 $\frac{1}{2}$	3	...	2	\$4.50

No. 3

No. 3 is a popular size and suitable for all branches of the mechanical trade. Will burn $1\frac{3}{4}$ hours and gives 2500 degrees of heat.

148531	3	$1\frac{1}{2}$	7 $\frac{3}{4}$	4	...	3	5.00

No. 4, Flat Auto

Although No. 4 was designed for the automobile trade, it has become very popular with all classes of mechanics. The container being flat makes it very convenient for tool cases. Will burn $1\frac{1}{4}$ hours and gives 2500 degrees of heat.
